

Enterprise Merchant Sales-Based Financing Platform

Governed Architecture & Implementation Progress

A governed enterprise platform progressing from deterministic foundations to adaptive portfolio strategy.

G2 CONTRACT ACCEPTED
End-to-end QA, evidence, latest/archive reproduction, and integrated consumption controls passed. Module 1 is complete and strategy development is authorized.

CURRENT DELIVERY

ACCEPTED

- G0 — Physical Data Foundation
- G1 — Governed Run Control
- M1.2–M1.17 — Module 1 Data, Risk, Economics, Contracts & G2 Acceptance

AUTHORIZED NEXT

- Module 2 — Strategy & Offer Decisioning

PLANNED

- Portfolio Management, Optimization & Learning Loop

Module 1 complete. G2_M1_CONTRACT accepted. M1.15 and M1.16 governed consumption contracts certified.

STRATEGIC SIMULATION HORIZONS

YEAR 1
Controlled market entry, core product launch, underwriting and servicing discipline, and early portfolio monitoring.

YEAR 3
Expanded strategy simulation, pricing refinement, segment learning, stress testing, portfolio optimization, and relationship growth.

YEAR 5+
Adaptive enterprise portfolio, continuous learning loop, dynamic line management, cross-cycle optimization, and a resilient merchant platform.

This governed architecture now certifies the Module 1 contract boundary and authorizes strategy build-out.

EVIDENCE, VALIDATION & CONTROLLED DELIVERY

Deterministic Generation
Same governed inputs produce the same governed outputs.

Snapshot Integrity
Parameter, profile, and source snapshots preserved with reproducible hashes.

Positive & Negative Controls
Expected outcomes and intentional failures validate logic and control effectiveness.

Reconciliation
Counts, distributions, business rules, and evidence outputs are reconciled before acceptance.

Contract Certification
M1.15 application consumption, M1.16 acquisition consumption, and the G2 bundle are latest/archive certified.

Versioned Delivery
Governed SQL, documentation, evidence, and release packages are maintained by build version.
